

Selfie stick with AI Face Tracking 1.9M

SKU:

EAN:

FEATUES

- AI-powered cloud-based follow-up shooting with gesture control  
Long press to power on. The device automatically recognizes the face and enters follow-up shooting mode. A solid green light indicates full-angle follow-up shooting with AI gesture control
- The extended design allows for full-body shots, and the 1.92-meter golden ratio length and wide-angle design make it ideal for handheld shooting and group photos.
- Image Stabilization with Gimbal  
360° rotating gimbal design makes shooting simple and the footage more stable, ensuring smooth and consistent images no matter how you shoot.  
Remote shooting with a detachable Bluetooth remote control allows for shooting from up to 10 meters without assistance.
- With a click, it pops open with one click  
The one-click pop-open design utilizes a more convenient double-keel structure, offering superior resistance to tipping, balance, and stability in strong winds and complex terrain.
- It can also be used with 1/4" scale mirrorless cameras, and is widely compatible with various photography devices and fill lights.

SPECIFICATION

Product Size	90x50x374mm
