FEATUES

- High resolution sound field optimization
The new development of 40mm moving-coil unit, using PU+PET composite diaphragm, high energy density iron and boron magnet, showing rich dynamics and details, so that you feel more realistic, more penetrating sound quality.
- Only 224G lightweight design
Blocking outside noise is more pure listening, ergonomic design, matching comfortable head beam, highly soft Yi grain leather material, providing you with comfortable wearing experience in the process of practicing vocal music.
- Second generation composite diaphragm
Inheriting the classic iterative research and development, PU+PET composite diaphragm unique material characteristics and hardness, so that high and medium frequency performance is excellent, bass is thick shock, instant performance of rewind and release freely.
- 6.5mm universal instrument interface connection
No conversion, plug and play, reduce the traditional adapter easy loss/transmission loss big problem compatible with electronic organ electric piano, electric rack drum electric guitar.
- Frosted texture process
The touch of frosted particles brings the art-like wearing experience, and the cool appearance design creates a good audio-visual atmosphere

SPECIFICATION

Monomer	Enclosed moving-coil type
impedance	32Ω
Sensitivity	105DB ±3DB AT 1KHZ
Power	30MW
Weight	200G
Input power	200MW
Plug	6.5MM or 3.5mm minijack with adaptor
Line length	3m
Accessories	PU Leather Bag
Wire	Plug woven wire (with volume adjustment)
