

Video light with application control softbox kit

SKU:

EAN:

FEATUES

- Professional RGB video light creates an adjustable color light for different types of shots. Special effects offer more options for video, photography, advertising, movies and sporting events
- Equipped with light which can be controlled by smart mobile device (Android 4.3 or IOS 11.1 or above), you can adjust hue, saturation, color temperature and the brightness by downloading APP in the app stores (such as Apple Store / Google play, etc)..
- You can set the channel (1-8) though APP and design by its memory function (2 sets of parameters can be saved). With preset three sets of scene modes (siren, fireworks, lightning), which can be freely switched to provide rich scene effects.
- This compact softbox diffuser is widely used for diffusing harsh flash/strobe lights and reducing unexpected shadow on the object you are shooting to achieve more natural and balanced look.

SPECIFICATION
