

Webcam desktop stand

SKU: 0010126

EAN:

FEATUES

The Edis Webcam desktop stand Specially designed a metallic base which has 4 non-slip cottons on the bottom to fasten the webcam stand, moving it without generating any noise and leaving any scratches on the table. The height of this webcam stand is adjustable and extends up to approximate 21inches/53cm when you are using gooseneck arm. You can adjust to a suitable angle and height to get the best shooting range. The tripod head with a 3/8"-1/4" screw thread and the steel ball head can rotate 360°horizontally and 140°vertically for your better use. Widely used for any stores, home studio, stages, broadcasting and video recording, etc.
